STRATFORD PUBLIC LIBRARY ANNOUNCES ONLINE STEM RESOURCE

Stratford Public Library launches STEM Village – a fun and educational online tool that helps students on their journey to success. Science, technology, engineering and math are subjects which often make students feel intimidated. STEM Village makes learning fun and accessible.

STEM Village is a great educational tool for teachers and homeschoolers as the modules are built with the Ontario curriculum in mind. STEM Village is also the perfect homework helper for parents struggling to assist students in grade school and high school. Students can review, strengthen and extend upon what is learned in the classroom through games, videos, and fun tutorials.

“We were really happy to find a ‘Made in Canada’ web-based learning site that took our school system, as well as technically important workplace skills, into account. Parents, especially home schoolers, will really find STEM Village valuable,” said Wendy Hicks, Director of Public Service at the Library. “STEM skills are required for approximately 90% of today’s top jobs, and it will only become more crucial in the future.

Sign up for STEM Village for free, with your library card. Any librarian will be happy to help families access STEM Village, or the other digital resources available at the library. Get started at splibrary.ca/stemvillage.
