CODEMOBILE VISITING STRATFORD

The Code Mobile van is making its way to Stratford! Code Mobile, an initiative of Canada Learning Code, has an impressive mission: to introduce over 140,000 youth across Canada to the power of technology by providing free coding workshops. The coding workshops teach youth computational thinking and technical skills in a social and collaborative way.

Coding has been an integral part of the library's new MakerSpace which opened in November 2017. The MakerSpace provides a coding club for kids and programmable robotics for anyone to come and use. "One of the great thing about coding is that it that it teaches you how to problem solve and think outside the box" says Krista Robinson, Systems Librarian.

Code Mobile will be visiting the Stratford Public Library on Wednesday August 22 and providing two workshops to youth ages 6 to 12. Kids will be using Scratch, a beginner level programming environment, to develop their own videogame. For more details and to register your child, visit splibrary.ca/codemobile.
